

Early Maize - FAO 260

Single cross Hybrid, Flint / Dent Kernel
Panam's Genetic – European registration

CARACTERISTICS

Plant height : medium
Ear height : medium
Early Vigour : good
Lodging resistance : good
Stay green : very good

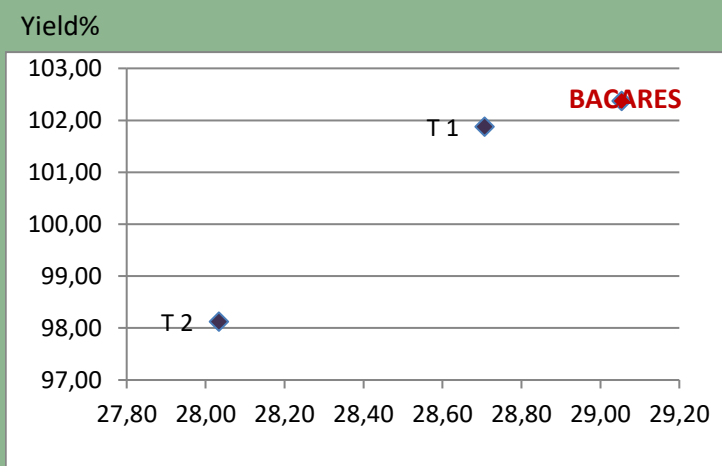

Very vigorous plant
Very good stalk strength
Excellent stay green

GROWING DEGREE DAYS (Base 6)

Flowering	840-850 °C
Silage (30% MS)	1410-1430 °C
Grain (35% H2O)	1630 - 1640 °C

TECHNICAL RESULTS

Development results - PANAM France

%H2O

BACARES is adapted in all situations.

- . Sowing density for silage : from 105 000 to 110 000 grains/ha
- . Sowing density for grain : from 98 000 to 105 000 grains/ha
