

IDEAL

EARLY - SILAGE

240 FRENCH FAO

KEYS STRENGTHS

Wide adaptability hybrid

Good dry matter yield

Excellent seedling vigour

IDENTITY

Three way cross hybrid
Flint-dent grain
European catalogue

HYBRID CHARACTERISTICS

- . Morphology
 - Leaf angle : semi erect
 - Homogenous
 - Good pollination
- . Plant height : High 7,5*
- . Seedling vigour : Very Good 9*
- . Dry matter yield : Excellent 9*

GROWING DEGREE DAYS (Base 6)		
Flowering	Silage (30% DM)	Grain (35% Moisture)
850°C	11430 to 1440	1660 to 1670

1 - Very weak
9 - Very good

MANAGEMENT TIPS

- . IDEAL is an excellent price / quality ratio with high and constant silage yield rating.
- . Avoid high density
- . Density in high potential : 95 000 grains/ha
- . Density in other situations : 90 000 grains/ha
